How to retrieve the data from Mysql database using a textbox input from the user?

See more: [HTML](#) [PHP](#)

Rate this: ★★★★★

I have created a page in html where i have placed a textbox and the user will supply the value in it which will then retrieve the data corresponding to the value from my mysql database. I am unable to retrieve the data.

[Hide](#) [Copy Code](#)

```
<!DOCTYPE HTML>
<html>
<head>
<title>Fetching saved records</title>
</head>
<body>
<div class="container">
  <div class="displaydetails">
    <form method="POST" action="RetrieveandDisplay.php">
      Enter the name to search data:<br/>
      <input type="text" name="FetchDetails">
      <input type="submit" name="Find" value="Find Data"/>
    </form>
  </div>
</div>
</body>
</html>
```

[Hide](#) [Expand](#) [Copy Code](#)

```
<?php
include('connectionstring.php');

if(!$connection)
{
    die('Could not connect to database :
'.mysql_error());
}
```

I have created a page in html where i have placed a textbox and the user will supply the value in it which will then retrieve the data corresponding to the value from my mysql database. I am unable to retrieve the data.

```
<!DOCTYPE HTML>  
<html>  
<head>  
<title>Retrieve Contact</title>  
</head>  
<body>  
<div class="container">  
<div class="dsp">  
<form method="POST" action="retrievedetails.php">  
Enter the first name of any contact to fetch: <br/>  
<input type="text" name="FetchName"/>  
<input type="submit" name="submit" value="Fetch Details"/>  
</form>  
  
</div>  
</div>  
</body>  
</html>
```

Here is my PHP code.

Hi, I have this php code

```
<html>
<body>
<div class="container">
<div class="fetch">
<form>
<label>First Name</label>
<input name="firstname" type="text" value=""/>
<label>Middle Name</label>
<input name="middlename" type="text" value=""/>
<label>Last Name</label>
<input name="lastname" type="text" value=""/>
<label>Phone1</label>
<input name="phone1" type="text" value=""/>
<label>Phone2</label>
<input name="phone2" type="text" value=""/>
<label>Email</label>
<input name="email" type="text" value=""/>
<label>Address</label>
<textarea id="address" name="address1" value=""/>

</form>
</div>
</div>
</body>
</html>
```
